

The Cartographer

Your World Build PDF

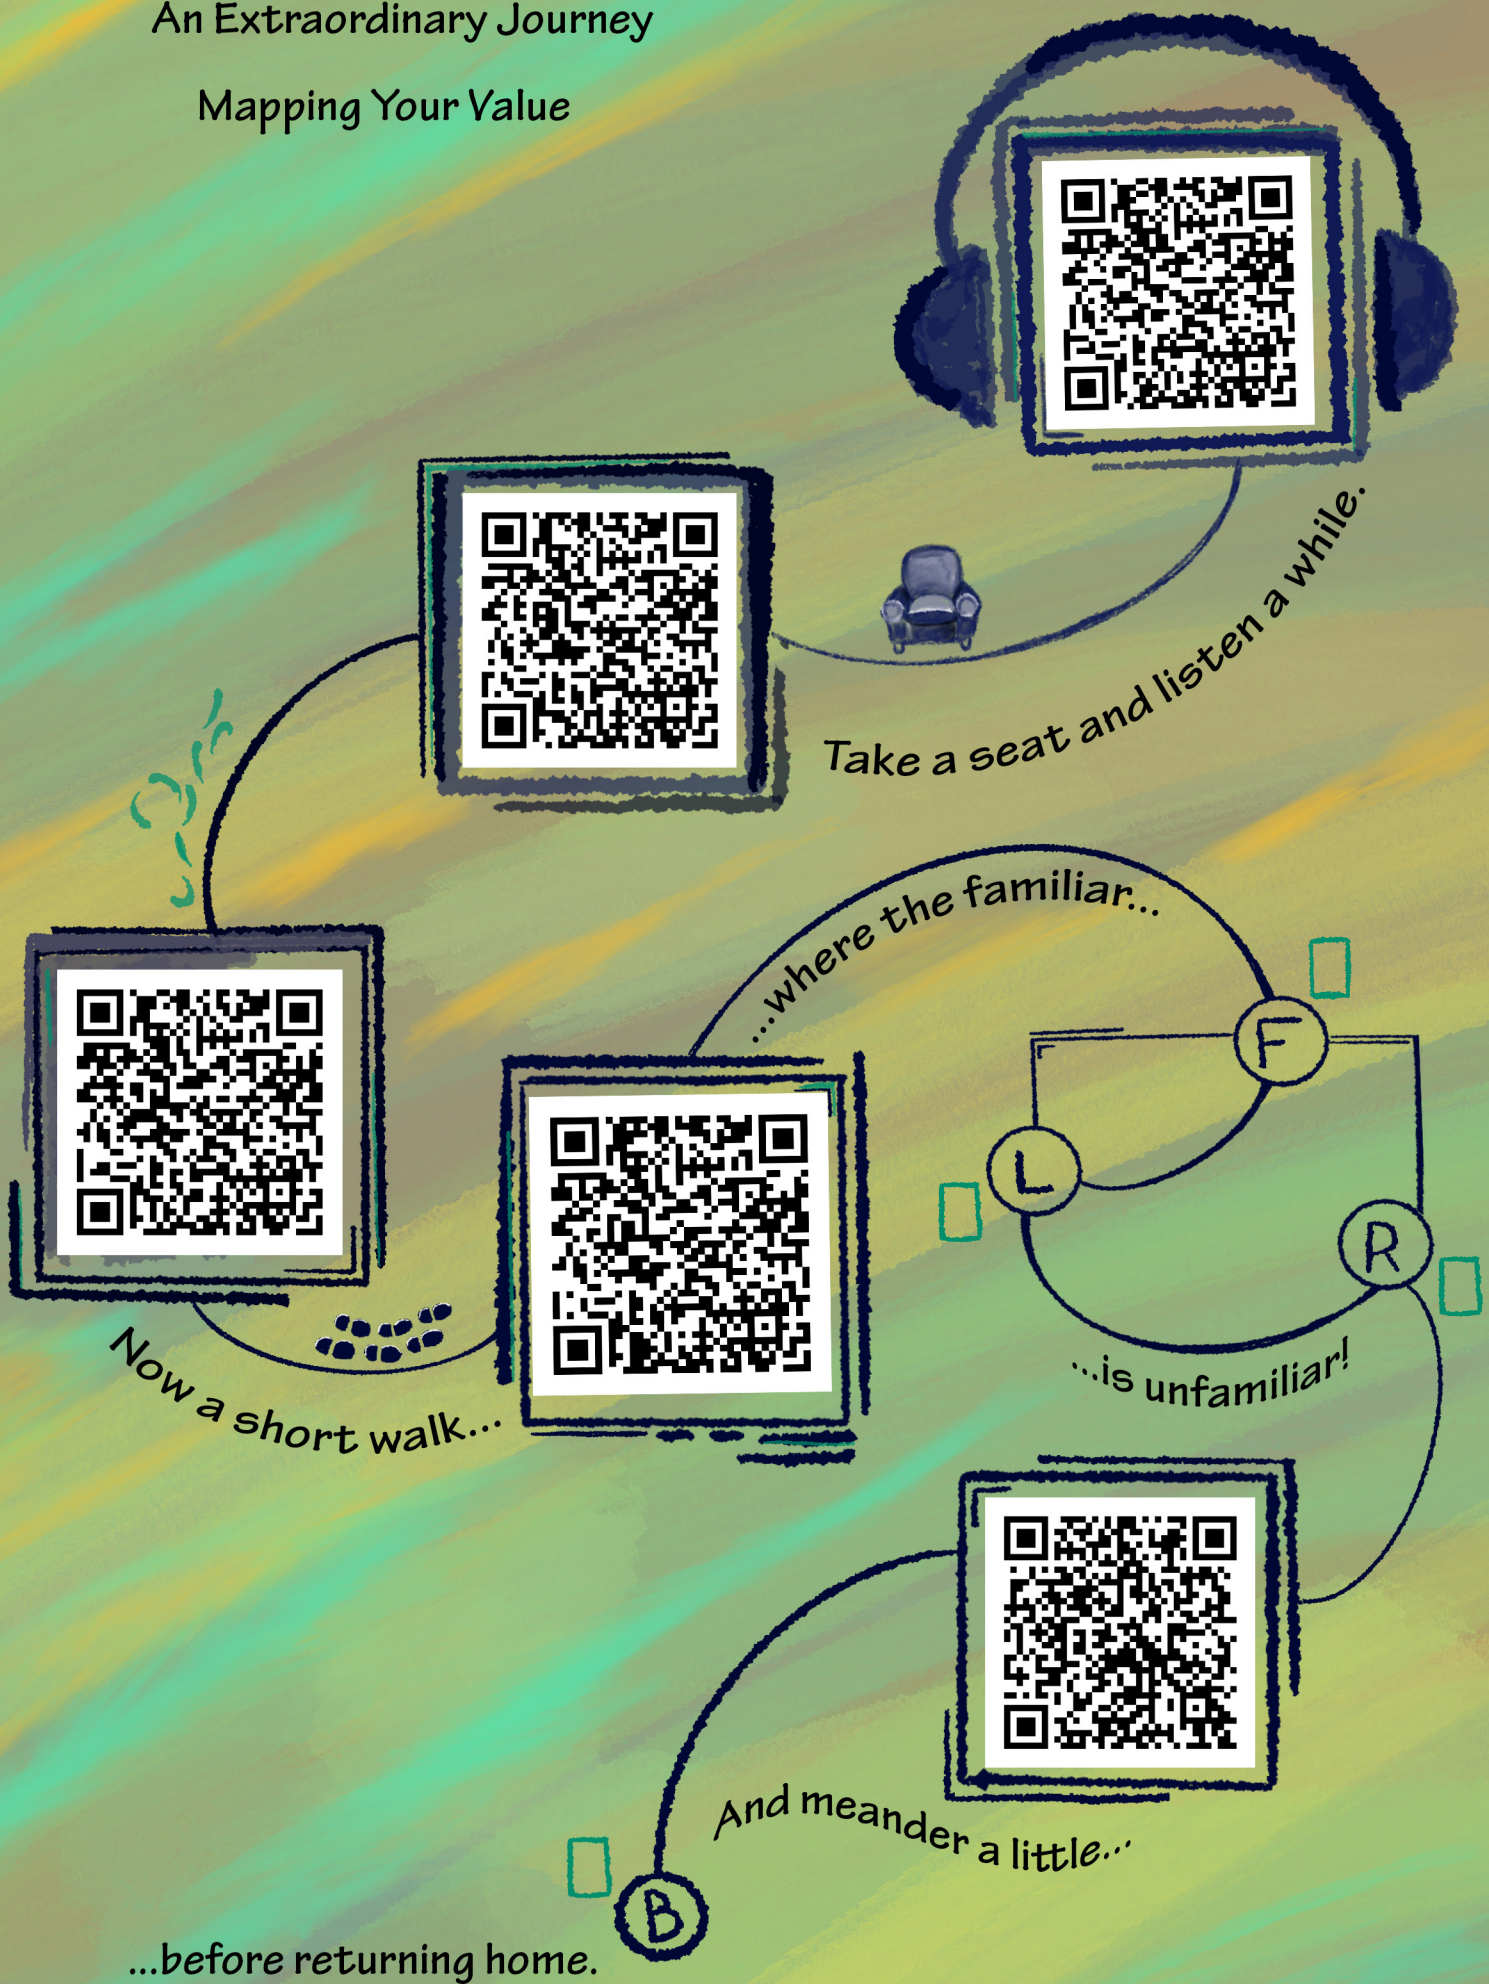

The Strategy

- Watch the overview video.
- Download and print the *World Strategy pdf* and download the *World Build* document.
- Place the *Front*, *Left*, *Right* and *Back* pages onto your workspace walls—the *Front* wall faces you as you enter the room.
- Place this *Strategy* page at your desk or on your main workspace so you can refer back to it anytime.
- Keep a notepad, pen and the *Mapping Your Value* page from this pdf with you as you move around throughout this module.
- Trigger the QR code at the top of this page using your phone and listen to the module breakdown.
- Sit in a comfortable chair, use your phone to trigger the first three codes on the *Mapping Your Value* page (headphones will help this be much more effective!). Make notes after each audio activity in your notepad.
- Keep the *Mapping Your Value* page, notepad and pen in hand and trigger the fourth code. This will take you on a walkthrough of your house. Map and make notes as you go.
- Head back to your core workplace—trigger the *Front* code (on the wall) and note, trigger the *Left* page and note, trigger the *Right* page.
- Then return to the *Mapping Your Value* page and trigger the final code.
- Once you've shuffled between left and right sufficiently, capturing what you need, trigger the *Back* page on your workspace wall.
- Collate all notes, photos, etc. and upload on the weekly review.
